Description

This is a movie website built using HTML, CSS, and JavaScript. The website allows users to explore a variety of movies and series, view detailed descriptions, and receive personalized movie recommendations based on their mood through an interactive mood bot. The design is responsive, ensuring a seamless experience across different devices.

Features

- Responsive Design: The layout adjusts to fit different screen sizes, making it mobile-friendly.
- Movie Listings: Users can browse through various categories of movies and series, complete with images and descriptions.
- Mood Bot: An interactive feature that provides movie recommendations based on the user's selected mood.
- Dark/Light Theme Toggle: Users can switch between dark and light themes for a better viewing experience.

Technologies Used

- HTML: For the structure of the web pages.
- CSS: For styling and layout, providing a visually appealing design.
- JavaScript: For interactivity, including the mood bot functionality and dynamic content loading.
- Git & GitHub: For version control and collaboration.
